So many egg-cellent ideas!

Boost Your Basement

Turn the normally drab space into an exciting extension of your home fit for exercise, movies, work and more with these creative ideas.

Paint everything white.

Windows aren't the only way to create a light, bright space. For this Portland, OR, remodel by designer Max Humphrey, "everything was painted white in a satin finish, so there's a slight sheen to the whole space for light to bounce off of." He added the feeling of height with vertical shiplap.

YOUR HOME / BASEMENTS

Mix textures for a living room vibe.

From a shiplap staircase to a chunky rug, texture shines in this lounge area filled with beige and brown tones. Finishing touches add appeal too. "Books and faux plants bring life, beauty and a sculptural quality into spaces," says Curated Nest's Lina Galvão.

Build in upstairs comforts.

Multiple TV's, a bar and game tables call for comfy seating, and lots of it, "for the whole family to enjoy." For this space, Lindsey Treasure of Alder + Tweed used a custom sectional, portable ottomans and stools that can be tucked under the bar-height table.

Living room: Jacob Snavely; designed by Curated Nest. "Precipitous" print: Eric Ransom/minted.com. Family room: Loren Branca; designed by Lindsey Treasure, Alder + Tweed.
