# Mixing & Matching

“One of our favorite trends is what everyone is calling **ORGANIC MODERN**. To achieve this look, layer in **TEXTURED, NEUTRAL PIECES** to create this multisensory experience. Use a mix of suede, boucle, and woven wallcoverings, as you see here.”

“Our favorite design trends from 2023 are a myriad of **MIXING TRADITIONAL AND MODERN FINISHES**, painted built-in bookshelves, and moving away from the ‘Modern Farmhouse’ trend and into the ‘Granny Chic/Grand Millennium’ moment. Our Bronxville project exemplifies all of these updated elements, and we love the way they showcase a classic and carefully curated composition.”
